## **NotePage, Inc. White Paper**

**Company Name:** A-1 Wireless Communications

**Web Address:** <http://a-vcorp.com/>

**Industry:** Telecommunications / Communications / Health Care / Hospitals

### **Business / Organization Description:**

A-1 Wireless Communications is a communications integrator; providing integrated communication solutions to a variety of industries.

### **How is PageGate Used:**

A-1 Wireless Communications has leased PageGate to local hospitals for their telemetry monitoring department. The telemetry department used PageGate on multiple terminals in the monitoring center to notify hospital staff if a patient being monitored has a life-threatening episode. The ability for multiple monitoring techs to send pages simultaneously is critical to the operation of this department of the hospital.

### **Customer Quote/Comments:**

*"The ability for multiple monitoring techs to send pages simultaneously is critical to the operation of this department of the hospital. Before PageGate, they had to have one person send all pages, which slowed down response time to critical situations."*
