NotePage, Inc. White Paper

Company Name: Comcast Communications

Web Address: www.comcast.com

Industry: Communications

Business / Organization Description:

Founded in 1963, Comcast has grown from a single system cable operation into one of the world's leading communication companies, focused on broadband cable, commerce and content. Comcast Cable is the country's third largest provider of cable services, and is expanding its cable operations to deliver digital services, provide faster Internet service with Comcast @ Home, and develop and deliver innovative programming.

How is PageGate Used/Customer Quote:

Comcast Communications use PageGate to text message Contractors and employees who work out in the field. Comcast has a dispatch office that handles calls from customers dealing with cable problems, or equipment problems. Then they are able to text message a tech or Management regarding these problems and take corrective action to get them fixed in a timely manner. With Pagegate running on a server it gives everyone the ability to text message someone in the directory at any time.

"This is a great product and we really like it."

Sarah Davis
